

Assist Forward — Electronic Contract CR ÿ BA Analysis and Verification Points

LOGIQUE Digital Indonesia

Business Analyst Review

Assist Forward Project — Electronic Contract Function

Change Request (CR) Analysis and Verification Points

client	Apple Auto Network (Apple Auto Network Inc.)
project	Assist Forward
phase	Implemented under the maintenance contract.
Document creation date	May 2026
Creator	LOGIQUE Digital Indonesia — AI Solution Consulting
CR status	Pending client confirmation.

1. Executive Summary

A change from the client (Apple Auto Network) to add electronic contract functionality to the Assist Forward platform.

A request has been submitted. This feature is intended for the next development phase. This request involves two types of contracts and documents.

This focuses on the generation function.

CR Overview	
Contract ÿ	Automobile Purchase Agreement — Dealer/Franchise (Buyer) and End Customer Concluded between (sellers). Must include vehicle information and customer information. Electronic format allows for 20 per document. The stamp duty of 0 yen will be exempt. This is an important feature for franchise expansion.
Contract ÿ	Consignment Sale Agreement — This agreement is concluded between franchisees when a consignment sale is finalized. Flow: Seller (franchisee) ÿ Headquarters ÿ Buyer (franchisee).
Document generation	Based on the attached vehicle order template, the system will generate the order form and invoice (vehicle order form). Generate.

ÿ Key requirements before development

Article 2 of the current contract requires a signature or name and seal. Before commencing development, Japan Electronic

Legal confirmation is required regarding the standards for electronic signatures applicable under the Electronic Signatures Act.

This is required. If this is not confirmed, the electronic contract may not be exempt from stamp duty.

2. Document Review Results

The following analysis is based on a review of two reference materials provided by the client.

- Car Purchase Agreement for Franchisees (PDF) —
Total of 10 pages: Terms and Conditions (Articles 1 to 12), and transaction pages for customer copy, store copy, and head office report copy.
- Vehicle Order Form and Invoice (XLS) — 2 valid sheets: for company-owned and U-MAX (franchise variant)

2.1 Automobile Purchase Agreement

Document structure

Page structure	Set of 6 duplicate contract forms: Pages 1-2 = Terms and Conditions (front/back, common to all versions), Pages 3-4 = Customer copy + Store copy (FC version), 5P = Headquarters report copy Contract report (FC only), 6P = Vehicle receipt.
Directly managed variant	The copy of the headquarters report (5 pages) and the franchise-specific marker section in the lower left corner have been omitted. Common Terms and Conditions Pages (1P-2P) are the same for both versions.

Key data items

Customer (Seller) Information	Name, phonetic spelling of name, date of birth, address, driver's license number, home/mobile/work phone number, email address, Occupation, place of work.
Vehicle Information	Manufacturer, model name, trim level, year of manufacture, engine displacement, registration number, chassis number, color, mileage, initial Registration date, vehicle inspection expiration date.
Payment breakdown	Contract amount, deducted automobile tax, outstanding loan balance, net payment amount, and bank account details for transfer.
Document checklist	Vehicle registration certificate, tax payment certificate, compulsory automobile liability insurance certificate, recycling certificate, seal registration certificate, resident registration certificate, power of attorney, transfer Certificates of exchange, etc. — Record the number of copies and the date of receipt for each.
Items to be declared	Meter rollback (none/present), meter replacement, flood history, hail damage history, repair history, modification history Details of defects, unpaid automobile tax, unpaid parking fines.
Equipment Checklist	Navigation/TV (original/aftermarket), audio system, alloy wheels, spare tire, warranty, inspection and maintenance. Record book, instruction manual.
Qualified Invoice)	Customers declare whether they are qualified invoice issuers, and if so, record their T-number. 2023 Requirements for October and beyond.
Distinction between owner and user	A separate field for cases where the vehicle seller is not the registered owner or user — The owner's name/address and the user's name/address are recorded separately.

Key legal points

Formation of contract (Article 2)	This agreement shall be formed by the signature or seal of both parties. Two copies shall be prepared and each party shall One copy shall be retained. This clause shall form the basis for the stamp duty obligation.
Supervised by JPUC	These terms and conditions have been supervised by the Japan Used Car Purchase Association (JPUC), supervision number 16KH00009, 2 Revised July 2023. Re-approval may be required for the electronic version.
Buyer information (FC)	In the FC version, the buyer is a franchisee (franchisee), and Apple Auto It is clearly stated that this is not the network headquarters.

2.2 Vehicle Order Form and Invoice

Document structure

Dual role	One document functions as both a purchase order and an invoice. Issued by headquarters to franchisees who make purchases.
Two seat variants : Seat 1 (Company-owned): Company-owned store version. Seat 2 (U-MAX): Franchise store variant, A	This includes vendor information (address, telephone number, fax number) for the Apple Auto Network headquarters.
Receipt Confirmation	The receipt agreement form is included at the bottom. After the vehicle arrives, the purchasing dealer will sign it and return it by fax. The procedure is paper-based.

Key data items

Vehicle Information	Year of manufacture, vehicle name, chassis number, color, mileage, headquarters management number. Assist Forward The assessment data largely overlaps with the previous data.
Price breakdown	The total amount due includes the vehicle price, recycling fee, equivalent amount of automobile tax, and 10% consumption tax.
Bank transfer information	—
Headquarters internal items	Store name, contact person's name, payment confirmation date, sales entry. These items are not displayed to the buyer. It's not there; it's presumed to be an item for internal processing at headquarters.
Transaction parties	Buyer's company name, contact person's name, and vendor information (Vendor = Apple Auto Network) Headquarters, address, and general contact information.

3. Scope Overview

Based on the CR description and document review, the documents and workflows included in the scope of this feature request are as follows:
It's Ori.

document	party	Priority/Notes
Purchase Agreement (Contract y)	Customer (seller) y Franchisee/ Company-owned store (buyer)	Highest. Key to franchise expansion and stamp tax elimination.
Consignment Sales Agreement (Contract y)	Seller FC y Headquarters y Buyer FC (three-party)	High — HIGH. Agreement to be concluded after the consignment sale decision.
Purchase Order/Invoice (Vehicle Purchase Order)	Headquarters y Participating Store	Medium — Generated within the system. Integration or separation of purchase orders and invoices is TBD.
Vehicle receipt (Vehicle receipt, 6 P)	The affiliated store confirms receipt of the vehicle.	Scope TBD — See separate document. Currently, please return by fax.

4. Points to confirm

Before commencing system design, you will need to answer the following questions. Questions marked with a y are new issues identified through the review of reference materials and were not included in the initial CR description.
is.

4.1 Contract Details and Field Mapping

Purchase Agreement (Automobile Purchase Agreement) — B2C

1. [Purchase Agreement]

The current paper contract includes a declaration checklist (odometer tampering, flood history, repair history, defects, unpaid automobile tax, unpaid parking fines). In the electronic version, should these be interactive checkboxes that customers fill in themselves, or should they be automatically entered based on Assist Forward's AI assessment results (AI for repair history detection, mileage anomaly detection)?

y Furthermore, when automatically inputting data from Assist Forward, this becomes an important system integration point, and a reduction in duplicate data entry can be expected.

2 [Purchase Agreement]

The current form includes a checklist of required documents (vehicle registration certificate, tax payment certificate, compulsory automobile liability insurance certificate, recycling certificate, seal certificate, residence certificate, power of attorney, transfer certificate, etc.), and records the number of copies and the date of receipt for each document. Should this section be included in the electronic contract? If so, please advise whether document receipt should be recorded/verified within the Assist Forward system, or whether it should be managed offline by simply printing it as a PDF.

3. [Purchase Agreement]

The payment breakdown section displays the contract amount, deducted automobile tax, outstanding loan balance, and net payment amount. Should these items be automatically calculated by the system from existing Assist Forward appraisal data, or should the store staff manually enter the amounts each time?

4. [Purchase Agreement]

The current contract requires separate information for the owner and user (owner/user) in case the vehicle seller is not the registered owner.

Should the electronic system also support this distinction? If so, what about identity verification?

Should the system be designed to automatically trigger the process of submitting additional documents?

Vehicle Order Form and Invoice (Vehicle Order Form) — B2B

5 [Purchase Order]

Currently, a vehicle order form serves the dual purpose of both an order form and an invoice in a single document. In the electronic system, this integration remains unchanged.

Should we do that, or should we separate them into two distinct documents with independent document numbers?

↳ Separating the processes improves the accuracy of the accounting workflow, but increases the complexity of document management.

6 [Purchase Order]

The current purchase order includes an acceptance of receipt terms (receipt confirmation section) at the bottom, which the purchasing dealer signs and returns via fax after the vehicle arrives. Should this be made into a separate electronic confirmation step (e.g., a "receipt confirmation" button in the Assist Forward app) and the system be designed to automatically trigger a status update?

7 [Purchase Order]

The current purchase order includes a headquarters management number. This is used in the existing Assist Forward system.

Is this the same identifier, or is it a new, independent document serial number assigned by the system?

4.2 Document structure and copy management

8 [Document Structure]

A paper contract is a multi-copy set consisting of up to six pages: customer copy, store copy, headquarters report copy (5 pages — contract report), and vehicle receipt. How should the distribution of copies be handled in the electronic version? After the contract is signed, should the system automatically distribute each copy via email or system notification, or should the store manually share each copy? Should I?

ý The headquarters copy (5P) is particularly important for franchise management and may need to be automatically sent to headquarters after electronic signature.

9 [Document Structure]

The Vehicle Receipt (Vehicle Receipt, 6P) is a separate document signed by the dealer at the time of physical vehicle handover. Should this be a separate electronic document generated and signed at the time of handover? Or is it outside the scope of this change request?

10 [Document Variant]

The company-owned store version omits the headquarters report copy (5P) and the bottom left highlighted section. Please check the following: (a) Are there any other content differences between the company-owned and franchise versions, such as signatories, legal clauses, or branding? (b) Are the franchise-specific buyer disclosure statements also removed in the company-owned version?

4.3 Legal validity and electronic signatures

11 [Legal Affairs — Critical]

Article 2 of the current contract states that it is valid upon signature or name and seal. The electronic version is not legally valid. Therefore, in order to be exempt from stamp duty under Japan's Electronic Signature Law, a qualified electronic signature is required. Has the client obtained confirmation from their legal department regarding the applicable electronic signature standards? Should the system integrate with a specific certified electronic signature service (e.g., GMO Sign, CloudSign, DocuSign Japan)?

ý This item is the most important prerequisite for this feature. Failure to meet the qualified electronic signature requirements may result in the contract not being exempt from stamp duty, risking the loss of the primary business value of this feature.

12 [Legal Affairs — Critical]

These terms and conditions have been supervised by the Japan Used Car Purchase Association (JPUC), with revision number 16KH00009 (revised July 2023). Will the electronic version of these terms and conditions require re-approval or re-supervision by JPUC? Are JPUC-certified electronic templates already available?

13 [Signature Flow]

Regarding B2C purchase agreements: The customer signs as the seller, and the merchant signs as the buyer. In the electronic flow, Will the customer sign on a tablet or terminal in the store during the appraisal, or will the contract be sent to the customer's email address? Will the dress be sent to the customer and signed remotely?

14 [Signature Flow]

Regarding the consignment sales agreement (Agreement ý): In the flow from seller FC ý headquarters ý buyer FC, who initiates the creation of the agreement? Does headquarters review and approve it before it reaches the buyer, or is it automatically forwarded? What constitutes "acceptance" from each party? Is sequential signing (each party signing in order) required, or is parallel signing acceptable?

4.4 Assist Forward System Integration

15 [Collaboration]

The purchase order includes bank transfer information (Mizuho Bank, Yokkaichi Branch, Apple Auto Network account number). For the electronic version, should the bank account information be stored as master data in the system and automatically reflected in the invoice, or should it be entered manually each time?

16 [Collaboration]

The purchase order includes internal headquarters processing items (store name, contact person's name, payment confirmation date, sales entry) that are not displayed to the purchasing franchisee. Should the electronic system support a two-tiered display: one for the purchasing franchisee and another for the internal headquarters processing that includes these additional items?

17 [Collaboration]

The vehicle data fields on the purchase order (year, make, chassis number, color, mileage, recycling fee, automobile tax) largely overlap with the data already obtained in Assist Forward's appraisal flow. Should contract generation be triggered directly from the completed appraisal record, with the vehicle data automatically entered? In that case, the main UX flow would be as follows: Approval of appraisal y [Generate Contract] button y Automatic contract entry y Signature request.

18 [Collaboration]

The generated contract is from Assist Forward.
Should contracts be stored and made accessible as an archive/history within the system? Is an automatically assigned document serial number necessary for tracking and auditing purposes?

4.5 Scope and Phase

19 [User]

Who are the target users who initiate contract generation within the system? — Are they store sales representatives, store managers, or headquarters administrators? Is role-based access restriction necessary (e.g., only store managers can confirm/submit contracts)?

20 [Language]

Should the generated contracts be in Japanese only, or should they be bilingual (Japanese + English)? Are there any standard legal templates already in use that the system should completely replicate?

5. Assumptions to be verified

The attached	A1 Vehicle Order Form XLS is a reference layout/template for electronic output of order forms/invoices. Please have the client confirm whether the final format is as intended.
The A2	consignment agreement (Contract y) is concluded between two different franchise stores (not within the same store), with the headquarters acting as an approver/intermediary. They act as intermediaries, handling the splitting of costs.
Legal verification regarding the validity of	A3 electronic contracts and their application of stamp duty exemption will be conducted by the client's legal team. This falls outside the scope of the LOGIQUE development team.
This A4	function will be in scope for the next phase. Once the requirements are finalized, answers to the confirmation items are received, and the scope is formally approved. We will not begin development until it is approved.
A5.	Vehicle data acquired through the existing Assist Forward appraisal flow (AI for repair history assessment, AI for price assessment, and OCR data entry) can be used as input information for automatic entry of contract fields.

This document was prepared by LOGIQUE Digital Indonesia as part of the BA review process for the next phase scope of Assist Forward. All questions are directed to Apple Auto Network (the client), and formal responses are required before the development scope can be formally finalized. Document version: v1.1 — May 2026.
